OBJECTIVE

Aspiring software professional passionate about problem-solving and technology design. Proficient in C++ and Object-Oriented Programming, with experience in technical projects and a strong drive to learn and adapt. Enthusiastic about working in team-oriented environments and delivering impactful solutions.

EDUCATION

B.Tech Information Technology, College of Engineering Guindy, Anna University, Chennai 2022 – 2026
CGPA: 7.48
School Education, Shree Niketan Higher Secondary School, Tiruvallur 2021 – 2022
HSC: 95.6% SSLC: 99.2%

PROJECTS

- AutoGuide – AI-Based Project Monitoring and Mentoring System** Dec 2025 – Mar 2026
| Python | NLP | LLM | CrewAI | 
 - Built an AI-driven system to monitor and evaluate software projects using proposal and repository analysis.
 - Designed a CrewAI-based multi-agent architecture with Repository, Progress, and Mentor agents for modular task execution.
 - Implemented shared memory communication enabling agents to exchange intermediate results efficiently.
 - Developed a coordinator module for dynamic agent orchestration and dependency-based scheduling.
- Cache Management System – LRU Cache Implementation** Jul 2025 – Aug 2025
| C++ | STL (list, unordered_map) | Data Structures | 
 - Developed an LRU-based cache system with O(1) time complexity using doubly linked list and hash map for efficient data access and eviction.
 - Implemented a two-tier architecture with primary cache and secondary storage, enabling automatic eviction and retrieval of least recently used data.
 - Integrated performance tracking (hit/miss rate), dynamic cache resizing, and an interactive command-line interface for real-time cache operations.
- Liver Disease Prediction System – ML-Based Health Risk Tool** Jan 2025 – Feb 2025
| Python | Scikit-learn | PostgreSQL | Streamlit | ML Pipeline 
 - Built a machine learning prediction system with a Streamlit-based interface.
 - Processed demographic and clinical inputs to generate predictions.
 - Used PostgreSQL for secure storage and deployed the application on Render.
 - Evaluated model performance using accuracy metrics for reliable predictions.

SKILLS

- Programming:** C++, Python
- Libraries:** STL, NumPy, Pandas, Scikit-learn, Matplotlib
- Databases:** PostgreSQL, MySQL
- Development Tools:** Git, GitHub, VS Code
- CS Fundamentals:** OOP, DBMS, DSA, OS, Machine Learning

CERTIFICATIONS & TRAINING

- C++ Essentials – Cisco Academy
- Python for Data Science – Infosys SpringBoard
- Advanced Prompt Engineering – Simplilearn

LEADERSHIP

- Visual & Creative Head – AstroClub, College of Engineering Guindy
- NSO Coordinator – Organized and participated in sports activities
- Vice President & Performer – Stunners Variety Team
